News

There are many facets to Ruby! And at this year's Rocky Mountain Ruby conference, be prepared to experience all those facets. We have gathered a host of amazing speakers and we will weave them into an exciting fabric together with workshops, great conversations, great food and drink, and of course, Boulder's wonderful outdoors.

Read More

Rocky Mountain Ruby is a single track software conference focused on the Ruby programming language in Boulder, Colorado happening September 25-27. It is a mixture of technical presentations, community events, and outdoor experiences. It's all about those passionate about Ruby coming together to share and learn from each other. We learn, have fun, and connect.
